

BROW CARE GUIDE

HEALING IT RIGHT

With your new investment, proper care is necessary to achieve the best results; diligently following your aftercare instructions can improve ink retention by up to 70%.

Your second session (touch up) will reinforce the colour, additional strokes will be added to add depth and colour intensity. It also gives us an opportunity to see how your skin heals, review pigment retention and make any necessary adjustments.

Multiple sessions may be required to encourage ink retention in new clients and in clients who have waited more than 1 year between maintenance touch ups.

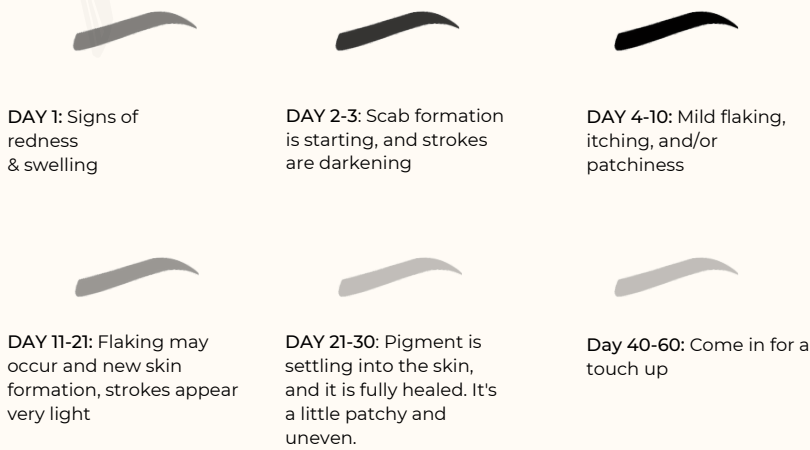

These minor touch ups may be booked as needed within 4-8 weeks of the previous session.

NOTE: Please be advised that although rare and adverse reactions are possible. Reach out to a medical professional immediately should you experience severe side effects (intense swelling, hives, etc) or if any signs of infection develop.

HEALING PHASE

A little patience goes a long way. They will appear 15% thicker and 40% darker. Do not be alarmed by the darkness and the intensity of the eyebrows. Trust the process.

*Patchiness and fading are completely normal parts of the healing process.

AFTERCARE

We always do our best to ensure our work is at its highest standard. As we know, the skin is a living organism, and healed results are unpredictable. Your new look is now in your hands, and we ask that you devote the utmost care to it. ♥

Overly touching, rubbing, scratching or picking the area will disturb the natural healing process, and may cause scarring.

Please ensure a snug fit for facemasks, to avoid excess humidity from breathing. Use medical tape to seal the the nose/under eye area.

Products that we love or must use that can fade or change the colour of your enhancement over time.

- Antibiotics
- Hormone therapy
- Rejuvenating skin serums (Vitamin C, Vitamin A, salicylic acid)
- Exfoliation products
- Facial lasers (fraxel, IPL)

We encourage you to use the aftercare products given, as this will help us keep track of potential adverse reactions.

Please contact us for alternative aftercare options.

DO'S
